

The tactical advantage of the AN/PRS-11 Suitcase Portable Receive Suite (SPRS) is its impressive situational awareness capabilities, packed in a portable and super low-profile package.

When extended operations or remote locales call for even more in-field flexibility and uptime, the Solar Panel Power Accessory Kit delivers on demand portable, powerful, and rechargeable energy for continued operation. Warfighters are able to maintain acute, situational awareness whenever and wherever they need it with 24/7 uninterrupted power / signal integrity.

Solar Panel Power Accessory Kit

For the AN/PRS-11 Suitcase Portable Receive Suite (SPRS):

Solar Panel Power Accessory Kit contains:

- Solar Panel (62 watts) and Carrying Case (not shown)
- Charge controller cable with interface for input with two BA-2590 batteries, direct connection cable to AN/PRS-11

Benefits

Attributes

Portable	Lightweight and compact. Folded, the panel fits into same 8.5" x 14.5" footprint as the SPRS. Panel opens to 52.5" x 30" when unfolded
Powerful	Solar Panel provides 62 watts at 15 volt output
Rechargeable	System will recharge a BA-2590 Battery in 5-6 hours. Automatically charges two user supplied BA-2590 batteries while supplying power to the SRPS*
Extended Life	Two fully charged BA-2590's alone will provide enough power to run the SPRS for greater than 24 hours. Allows users to provide power to the SPRS unattended for 24/7 operation*
Built Rugged	Solar Panel is rugged and tested to MIL-STD-810F

* Assumes the panel is exposed to direct sunlight for ~ 10 hours in a 36 hour period.
